## Firefox with Tab Candy

Aug 4th, 2010 by pollyalida. No comments yet

I want this **now**! I always have so many tabs open in my browser. I keep moving them around so they're near other related tabs – and that drives me crazy. And just having so many open at once saps my energy sometimes. It all looks so overwhelming, kind of like my desk and office!

This idea is just so functional and elegant. I'm going to download the [alpha version](#) right now!
